THE ART OF CRESTRON

Control, Media Distribution and Entertainment Solutions for Yachts

CRESTRON

TOTAL CONTROL

Luxury yachts are homes away from home. Enjoy the same elegant lifestyle of comfort and convenience at anchor, in the marina, cruising the coast or on the ocean waves as you do relaxing at home. Browse, select and play favourite entertainment without leaving your seat. Adjust lights, blinds and temperature – even control the hot tub. Whether from a touch screen, remote, custom keypad – even from your favourite smart phone device – total control is always at your fingertips. More than just a pretty interface, Crestron systems are rugged and reliable, perfect for this mobile environment.

Offering integrated solutions for audio, video, computer, environmental systems and lighting control, Crestron streamlines technology, improving the quality of life in commercial buildings, universities, hotels, yachts, hospitals and homes. With offices all over the world, Crestron offers a truly global operation with local support.

"Having been on yachts of all descriptions for the last 17 years as crew and captain, I have followed Crestron with interest. Upon joining the company, I have found myself on the dynamic edge in an ever evolving industry. Crestron has solutions to suit every need, ensuring Owners, Guests and Crew can extract the maximum pleasure and function without fuss from the vessel, no matter what the size. With over 40 years as a global company, we are uniquely placed to ensure that the clients are provided with all manners of support, 24/7/365.Yachting is always described as a lifestyle... Crestron is the ultimate lifestyle enhancement."
Dallas Tacon, Crestron Marine Division

"After almost two years of world cruising and 45,000 nautical miles we have found the Crestron system onboard Red Dragon to be easy to use and very reliable. We have had many guests onboard and everyone has found the system extremely user friendly and a huge improvement on the system we had on the old Red Dragon - there is no comparison between the two! Crestron wins time and time again, I would definitely recommend the system to any other yacht owner"
Benjamin G. Marshall, Captain SY Red Dragon

INTERACTIVE LIFESTYLE

Integrating lighting, audio, video, environmental systems, networks and communications, navigation interfaces and security, Crestron creates the modern solution for the modern yacht. Crestron lets you indulge in luxury with a single touch of a button. We can provide the solutions that are needed to integrate and control the various technologies found on modern yachts, and we also provide global support to go with it. Imagine with just a single touch, the lights dim, blinds close, the screen turns on and your favourite movie begins. Imagine at night the lights automatically illuminate as you and your guests approach. Imagine what the Crestron Marine experience can bring to your lifestyle.

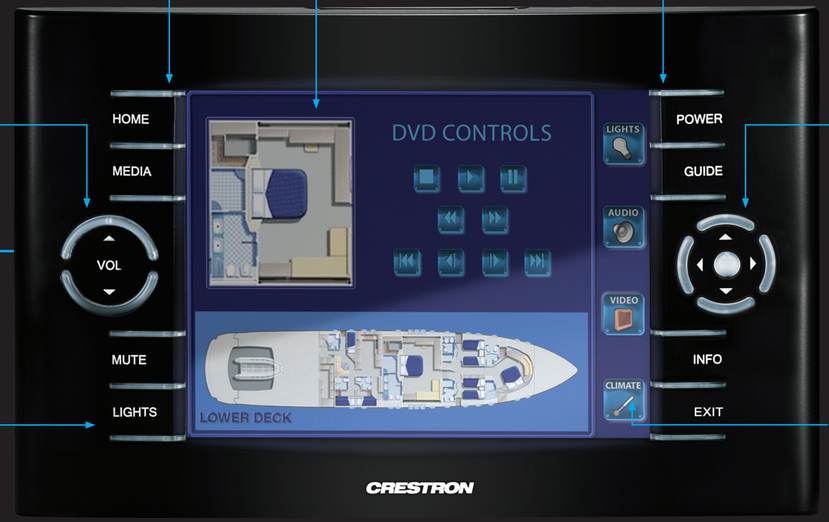
"We have been programming Crestron control systems since 1999 working on some of the most prestigious and complex installations in the world. Crestron suits the marine environment and we have written software for some of the most luxurious privately owned mega yachts on the water today. We believe a user interface should be as slick as it is functional and, working with Crestron, we ensure a touch screen layout is as beautiful as it is practical."
Jacques Favalier, ESP Intl
(Crestron Service Provider)

Press to take you straight back to your touch screen home menu. Navigate through your personalised functions from there.

Dynamic, easy-to-use graphics to display useful data, from audio and video settings, lighting levels, through to album cover art or 3D effects for enhanced depth.

Engraved tactile pushbuttons with clean appearance for support of critical stand-alone functions.

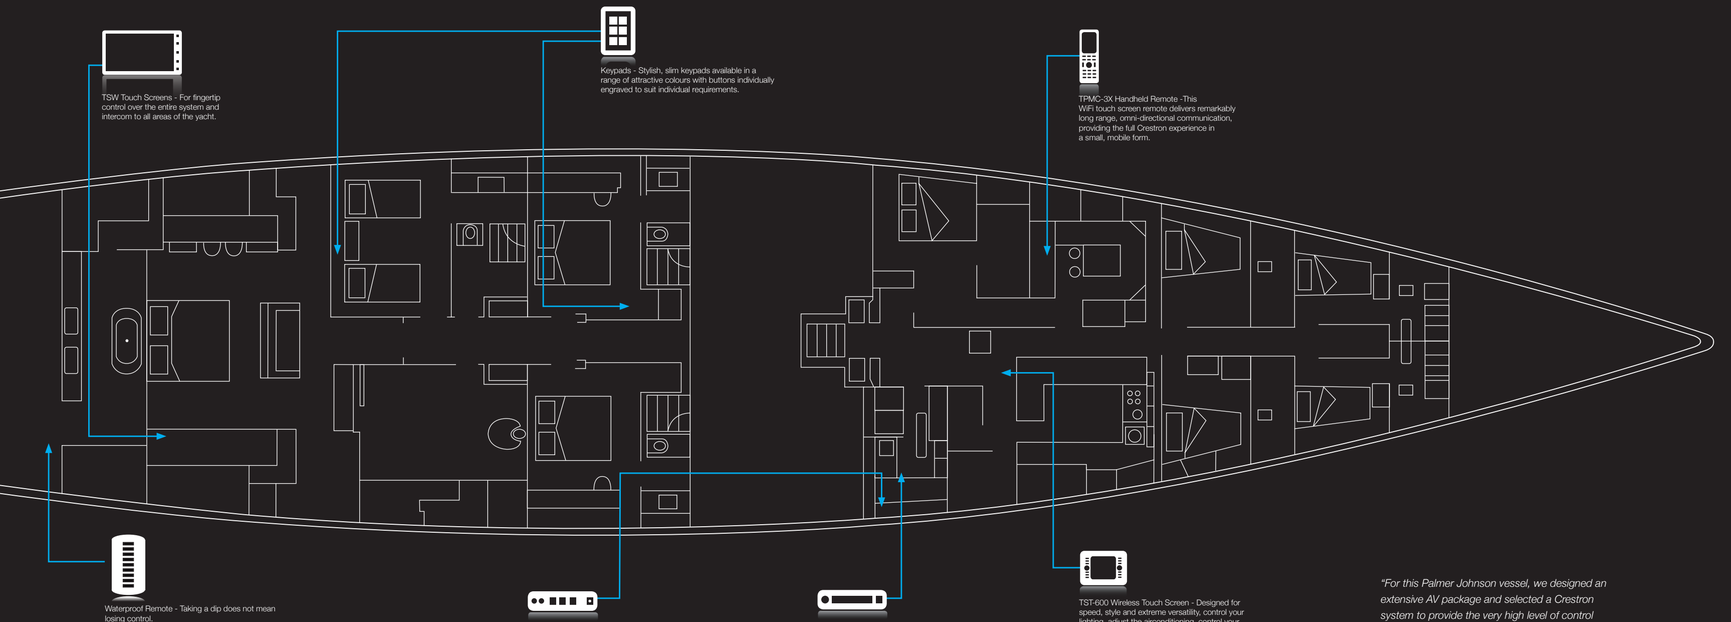
Illuminated pushbutton ensures quick access to volume adjustment up or down when you need it.



Navigate up/down, left or right positively and quickly through your touch screen display and settings.

Touch screens eliminate piles of remotes and can be wired or wireless. Each one can be tailored to your unique design and application.

Universal icons give one-touch control over all essential functions including lights, audio, video and temperature.



TSW Touch Screens - For fingertip control over the entire system and intercom to all areas of the yacht.
Keypads - Stylish, slim keypads available in a range of attractive colours with buttons individually engraved to suit individual requirements.
TPMC-3X Handheld Remote -This WiFi touch screen remote delivers remarkably long range, omni-directional communication, providing the full Crestron experience in a small, mobile form.
Waterproof Remote - Taking a dip does not mean losing control.
Services Cupboard / Rack Room Crestron DigitalMedia™ - DM® is the only complete, integrated solution for the digital age, accepting and distributing all analogue audio and video and supporting 4K distribution, high-res computer, HDMI®, DVI, DisplayPort, Ethernet and USB keyboard / mouse control.
DIN-Rail Lighting Solutions - DIN-Rail lighting and control modules.
TST-600 Wireless Touch Screen - Designed for speed, style and extreme versatility, control your lighting, adjust the airconditioning, control your music and movies.

"For this Palmer Johnson vessel, we designed an extensive AV package and selected a Crestron system to provide the very high level of control required to realise our vision."
Darryn Jacobs of AV Synergy

CUSTOM DESIGN

Crestron connects people with technology.
As products and systems become more complex, our solutions streamline and simplify technology so everyone can enjoy its benefits. We understand that our touch screens, keypads, and handheld remotes are how everyone on the yacht interacts with and experiences all the onboard entertainment, communication and control systems. We allow individuals to create a comfortable environment, set a mood, and fully enjoy the benefits of technology.
Our products contribute to enhance a décor; complement a lifestyle or personalise a room. And we appreciate that not all interior design tastes are the same - this is why we offer a wide-range of decorative faceplates and keypads that complement almost any décor; we design smaller, slim-profile wallmount keypads that are more discrete; we offer the most brilliant graphics and intuitive, customised lay-outs for your touch screens; we integrate more of the technology that people want and use everyday into our touch screens; we provide ergonomically designed and easy-to-use wireless controllers, and flush-mount touch screens of every size… The variety of products available and the breath-taking functionality of Crestron systems means that, whatever you want, we are sure to have the solution. And because we can monitor and control all electronics on board, we can help reduce energy bills by intelligent programming, automated on/off switching and even occupancy detection systems.

BEAUTIFUL DESIGN

CREATIVE APPROACH

At Crestron we believe beauty in design should extend beyond the conventional boundaries, particularly in the yachting world.

Our touch screens, keypads and wall panels are sleek yet functional. Your design is unique to you and we offer a variety of finishes to suit your individual needs. Crestron combines beauty with functionality. This functionality and the programming of our systems offer you the ultimate in fingertip control – and our global network means we can support you wherever you are in the world.

"*We have used Crestron controls very successfully to give our clients a user friendly system that I am happy to recommend to other clients and owners. We are using it on many new projects, ashore and afloat, with great success.*"
Andrew Winch, Andrew Winch Designs

INNOVATME

REALISE YOUR DREAM

We are committed to providing the best products and cutting edge technology for all your onboard control and automation dreams. We listen to what you want, and working with the industry, we have designed a variety of products ideal for the marine environment. Take the WPRI-48 waterproof remote for example – perfect for the rigours of the yachting world! From fingertip control to wireless technology and the ability to seamlessly integrate with your ship's navigation, communication and environmental controls, we can help you realise your dreams. With highly skilled Crestron programmers available worldwide and the very best in elegant and high-performance products available, there is a solution for all your control requirements.

FOR THE DIGITAL AGE

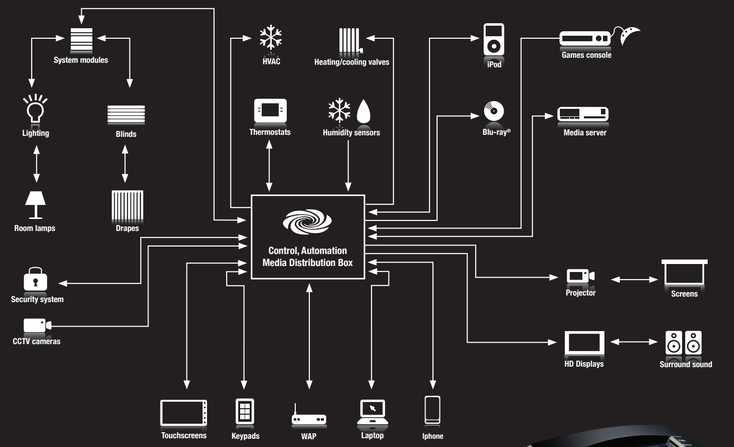
CRESTRON DIGITALMEDIA™

4K

From your home to your yacht, you want to display the latest digital sources at their highest possible resolution. You want to integrate digital and analogue audiovisual signals and emerging technologies such as streaming and 4K Ultra HD. And you want it to work flawlessly every time. That's what you get with Crestron DigitalMedia™ (DM®).

DigitalMedia is the only fully-engineered, field-proven, end-to-end solution for managing and distributing digital audiovisual and control signals. Whether you have one room or a thousand, DM delivers pure high-definition - including 4K Ultra HD - to every display throughout your yacht or home. Cabling is simple: all that's required is a single run of DM8G+ Copper cable or CresFiber™ (a lightweight fibre optic cable) around the yacht. Why sacrifice quality when it comes to HD distribution – Crestron DigitalMedia is the answer.

IMAGINE THE POSSIBILITIES...



Crestron technology can incorporate an impressive array of applications for the yacht such as lighting, HVAC, shade control, audio and video distribution across the vessel.

TOTAL CONTROL AT THE TOUCH OF A BUTTON

Wireless means the freedom to roam around the yacht, room, pool or onboard gym while effortlessly managing your every control need. Stylish and compact, the two-way touch screens feature real-time system feedback, enabling easy selection of music by title, artist and genre or the monitoring and adjustment of volume and room temperature from anywhere in the yacht.

5.7" WIRELESS TOUCH SCREEN

The next generation TST-600 Wireless touch screen from Crestron delivers enhanced wireless control for the home, boardroom, or classroom in a stylish, ergonomic design.

High-performance streaming video capability makes it possible to view security cameras and other video sources over the network right on the touch screen. Placing the touch screen onto its docking station charges the internal battery, and can provide a wired Ethernet connection in the absence of Wi-Fi. Featuring a low-profile design, the docking station fits easily in a cabinet or drawer, and looks stylish yet unimposing on a countertop or side table.

TSW TOUCH SCREENS

The new TSW touch screen range offers powerful Smart Graphics™ in a choice of three space-efficient surface mount and tabletop designs. Each features an edge-to-edge capacitive touch surface, H.264 streaming video, Rava™ SIP intercom, voice-command, single-wire PoE connectivity, and standard gang-box installation.

WIRELESS STREAMING USING AirPlay®

Listeners can use AirPlay to instantly connect with their own dedicated network stream player, turn on the home audio system, and enjoy their favourite music from any app – all with just a single tap on the device in their hand. When integrated with a whole house audio system, such as Sonnex®, the family member can use the Crestron app on their device (or a Crestron touch screen) to direct that music to any room or every room in the house. The CEN-NSP1 opens the door to literally any Internet radio service with an iOS® app.

MLX-3 HANDHELD REMOTE

The MLX-3 affords intuitive control for an entire yacht or custom home through a brilliant user interface that's simple to use — and just as simple to configure. Featuring customisable scrolling menus and full-colour icons, the MLX-3 makes it easy to select your room, pick a media source, choose a radio station, TV channel or media title, and even access lighting and other environmental controls — all without having to flip through endless confusing pages of static buttons.

WPRI-48 WATERPROOF WIRELESS REMOTE

The waterproof remote is ideal for a wide range of uses with the distinct benefit of being completely waterproof. Use it in the shower, bath, or hot tub to safely control your entertainment system, security system and cameras, lights, and even your spa settings. Use it anywhere without concern if it would fall in the water or get rained on. Even on the deck of a luxury sailboat or yacht, whether docked at the marina or cruising out in open waters, the waterproof remote delivers all the benefits of an advanced wireless handheld controller for your seafaring home away from home.

INNOVATIVE SOLUTIONS FOR THE MARINE WORLD

SONNEX®

Sonnex® is simply the best sounding, most powerful audio distribution solution on the market. Featuring high output power, high efficiency, advanced DSP, flexible configuration, and integrator-friendly setup. Sonnex is ideal for restaurants, sports bars, night clubs, hotels, banquet halls and custom homes. Sonnex is engineered to integrate perfectly with DigitalMedia™ to form a total media distribution solution with minimal wiring — and minimal headaches.

Sonnex is fully scalable using expansion units that can be placed centrally or remotely, with simple hookup using a single shielded CAT5e or fibre optic cable. Start with the SWAMP-24X8 at your head end, and add up to eight SWAMPE or SWE expanders for an astounding 74 stereo zones of robust, audiophile sound quality. A generous 24 inputs are provided at the head end to handle analogue and digital sources.

Additional features include an expanded assortment of digital and analogue line level outputs via the SWE-8 unamplified switcher, support for driving 70V or 100V speaker lines via the SAT-70V/100V output transformer, and Sonnex Link signal extension using the S-EXT1-S fibre extender.

FACEPLATES AND KEYPADS

Simple yet powerful keypads and panels to control lights, thermostats, blinds, security, entertainment and more. Crestron Designer, Decorator and Cameo® Series of keypads are available in a variety of configurations, colours and finishes to complement any yacht interior.

DIN-RAIL

Highly efficient, cost-effective and requiring only a fraction of the space of a traditional equipment rack, DIN-Rail are ideal for the marine environment. The range features products for every lighting application, each designed for standard installation in a wall mount enclosure, equipment rack, or on a flat panel. The standardised form ensures easy installation, testing and maintenance, and modules simply snap onto the DIN-Rail in the cabinet. Modules are accessible from the front of the enclosure and connections are easy using removable terminal connectors. Modules include a power supply, 3-Series controller, distribution block and more.

LIGHTING CONTROL

Crestron offers integrated lighting automation and control for every environment. Lighting sets the perfect scene and creates the desired ambience for any occasion. Whether it's movie night, an intimate dinner for two on the upper deck, a business party or a quiet Sunday brunch reading the newspaper, lighting establishes the right mood. Dimmers can adjust internal lighting according to natural light levels or incrementally over a pre-determined time period.

HVAC CONTROL

Keep comfortable at all times monitoring temperature and humidity levels automatically. Control multiple zones from any location and easily pre-set temperature set points. Optimise energy efficiency by automatically adjusting to more comfortable temperatures according to your travel schedule. Leaving early? Use your laptop or iPhone® to control the HVAC remotely, even monitor the wine cooler or whirlpool temperatures.

CRESTRON SPEAKERS

The product of expert audio engineering, Crestron speakers deliver high-end performance for demanding residential and commercial installations. Select materials and a refined appearance underscore the meticulous design behind every model. The result is a complete line of in-wall and in-ceiling speakers worthy of a place in every room
